SUMMARY

AI Engineer and Founder specializing in production AI systems — combining machine learning, LLMs, backend APIs, and cloud deployment to build real business products. Currently building and operating DataAgent X, an AI-powered analytics SaaS for ecommerce businesses, end-to-end as a solo founder. Seeking remote **AI Engineer / Applied AI / Founding AI Engineer** roles.

TECHNICAL SKILLS

AI Engineering

Production AI Systems LLM Applications OpenAI API Prompt Engineering AI Agent Systems LLM Tool Calling Concepts
LangGraph Fundamentals LLM Evaluation Concepts AI Observability Concepts

Machine Learning

End-to-End ML Pipelines Predictive Analytics Classification Regression Time-Series Forecasting Churn Prediction
Feature Engineering SHAP / XAI Gradient Boosting Models Scikit-learn

Backend & Data

Python FastAPI REST APIs Next.js Supabase Supabase Auth PostgreSQL Shopify API Stripe Render Vercel Hostinger Git
GitHub SQL Pandas NumPy

EXPERIENCE

Founder & AI Engineer

2026 – Present

DataAgent X · dataagentx.app

- ▶ Built and operate a production AI SaaS for ecommerce analytics integrating machine learning, LLMs, predictive analytics, backend APIs, and cloud deployment.
- ▶ Designed end-to-end ML workflows covering feature engineering, automated model selection, explainability (SHAP), churn prediction, and revenue forecasting.
- ▶ Developed an AI Business Copilot powered by GPT-4o for conversational analytics over live ecommerce data.
- ▶ Built production infrastructure including Supabase, Shopify integration, Stripe / Lemon Squeezy payments, PDF reporting, and flexible data ingestion.
- ▶ Implemented user authentication and session management using Supabase Auth with JWT-based access control.
- ▶ Leading founder-led B2B outreach, market validation, and product development while actively looking for first paying users and continuously iterating toward product-market fit.

PROJECT

DataPilot AI — Production AutoML Platform

github.com/varun539/datapilot-ai

- ▶ Built a production-ready AutoML platform for model training, evaluation, comparison, explainability, and business reporting.
- ▶ Integrated GPT-powered dataset understanding, conversational analytics, and executive AI reporting.
- ▶ Modular ML workflows: preprocessing, SHAP explainability, experiment tracking, leakage detection, model registry, and batch prediction.
- ▶ Automated model comparison across XGBoost, LightGBM, CatBoost, Random Forest, and Gradient Boosting via cross-validation.

EDUCATION

Lovely Professional University

Expected 2028

B.Tech — Computer Science & Engineering (Data Science)
